Scanning the QR Code with the camera on your phone will automatically take you to a video that explains how to use your new bidet.

Step 1

- Point your camera at the square with the black & white pattern (pictured on the image to the right).

This black & white pattern is called a "QR Code". Do not push a button like you would when taking a photo. Simply hover your phone above the QR Code then continue with Step 2

Step 2

- When your phone reads the QR Code, your phone will automatically display a yellow rectangle below the QR Code.
- When you see this yellow rectangle, using your finger, click on the yellow rectangle. Your phone will automatically take you to a video on your phone.

Step 3

- Watch the video to learn and understand how to use your bidet and remote control.
